Hydroponics: Growing Your Own Food

Hydroponics is a growing alternative to produce high quality and profitable specialty crops such as herbs, greens and cut flowers in places that are not suitable for cultivation. Hydroponic technologies also have the advantage of increasing production per square foot in comparison with traditional agriculture.

Join us on **Tuesday May 9th** to learn about hydroponic growing techniques, including a demonstration and displays.

Register online at: <https://goo.gl/StsFam>

Dinner will be provided with registration.

Early Online Registration: **\$10 (plus tax)**

At the Door Registration: **\$15**

NOTE: There are no registration refunds for this event. **Ticket sales end on May 7th.**
